The best part of this card is I can add multiple profiles to this card. As I run 3 Businesses, this feature has made my job a lot easier. Also, this card is water-resistant and tear-proof, so for a rough user like me, it's an excellent product. ❤️

Outstanding product. It saves me from carrying multiple bulky cards. Now all I have to do is just tap my Smart card on the prospect's phone, and I am done!
